A thick grease to protect and revive
saddlery leather
Description

- A heavy duty grease that renovates, softens and revives saddlery leather and helps protect against mould and mildew
- Will not rot stitching and can also be used on metal to help prevent rusting during storage.

Application

- Apply a generous layer to both sides of clean, dry leather prior to storage. For general use, apply to clean leather and leave for 12 hours. Wipe away any dressing that remains. Not suitable for aniline or untreated leather, suede or nubuck. Test on a hidden area before use.

Key Ingredients

- Red grease.
